Re: Sinkhole at 2952 W. Hovey

Randy Wimmer of the Health Department contacted this office concerning above sinkhole. He said that residents at this address were dumping trash into the sinkhole and that he had told them to clean it out. In addition, he said he would see what he could do about getting the sinkhole filled. Bob Corson and I visited the address and found that the sinkhole apparently drained a large area and would not be amenable to filling without causing flooding. I called Wimmer and advised him of the above fact and also that we could not help in finding fill material. He said he would relay the message to the residents.
